

TradeHub

Your platform. Your brand. Your students never see ours.

FOR FOREX & CRYPTO EDUCATORS

Courses, signals, and a trading journal — live under your name in days. No subscription fee; we're paid a share of what your students pay you.

WHAT YOUR STUDENTS GET

Course Hub

Lessons play inside your app, never a YouTube link. Progress tracking, locked chapters, and quizzes.

Trade Signals

Post once. Personal accounts can auto-copy; funded accounts get a safe alert instead.

Trading Journal

Trades log themselves from their exchange. You see who's actually trading, not just watching.

Most platforms don't know the difference. We built around it.

Prop-firm terms of service almost universally ban external trade copying. TradeHub routes signals differently from the ground up — a personal account can auto-copy a signal the moment it posts; a funded account gets a clean alert instead, so the student decides and keeps their pass.

THE MODEL

90%

Goes to you by default, settled straight to your own account.

10%

Keeps the platform running. Nothing upfront, nothing if you don't earn.

Negotiable, not a rule. Payments settle automatically on every charge — no invoicing, no chasing.

HOW IT WORKS

01

Apply

Tell us about your audience and how you teach today.

02

A 15-minute call

We confirm who you are and how you'll use signals.

03

We build it

Branding, pricing, your Telegram bot, your first course shell.

04

You launch

Send your invite link. Students never know TradeHub exists.

Workspaces are vetted, not self-serve — most applications get a reply within 48 hours.
